Bangalore, India | 8338904620 | dipsdeepak08@gmail.com | [Linkedin](#)

Summary

Functional Consultant with 5+ years of experience in supply chain planning technology, o9 Solutions platform implementation, and end-to-end solution delivery for global retail clients. Proven ability to translate business requirements into technical platform design, configure planning solutions, execute UAT/SIT test cases, and drive go-live across Demand Planning, Assortment Planning, and Merchandise Financial Planning workstreams. MBA in Operations & Strategy — IIM Udaipur.

Academic Profile

MBA	Indian Institute of Management, Udaipur	2021-23	Operation & Strategy	3.05
B.Tech	Indira Gandhi Institute of Technology, Sarang	2013-17	Electrical Engineering	7.7
12th	Chinmaya Vidyalaya, Therubali	2011-13	Science	91%

Professional Experience

o9 Solutions, Bangalore

May 2023 – Present

Senior Functional Consultant, Retail Industry-IDB

- Supported **full implementation lifecycle** — from business requirement gathering and solution design through UAT/SIT, go-live, and hypercare — for two o9 platform deployments across global retail clients
- Engaged in business-IT workshops with stakeholders across product, planning to understand Current Process and define Future state process capabilities, identify personas for scalable adoption via o9's integrated platform for **Demand Planning (Demand Forecasting, Assortment and Merchandising Planning)**
- Served as functional owner for defects raised — diagnosing defects, conducting RCA, and hosting client deep-dive sessions to define resolution and prevention paths for Merchandising modules.
- Designed and delivered **training programs** for **250+** users with 30+ role-specific use cases, runbooks – reducing UAT / Post-go-live support tickets by **12%** and maintaining structured knowledge repository across engagement
- Partnered with Performance and R&D teams to design and execute structured **UAT and SIT test scripts** for planning module use cases, documenting defects, tracking resolution, and validating solution performance against functional acceptance criteria prior to production deployment
- Collaborated with R&D during **GenAI rollout, testing** and **refining** prompt workflows in agile sprints, identifying defects, and accelerating first productized AI integration in o9 platform

Bhushan Power & Steel Limited

June 2017 – Feb 2020

Assistant Engineer, Color Coating Line

- Monitored and controlled raw material inventory across **6 production lines**, ensuring timely availability and minimizing risks of stockouts
- Reduced line stoppages by **20%** by implementing safety stock thresholds for critical paints and introducing balanced material allocation across production lines
- Leveraged ERP (**SAP MM**) for real-time inventory tracking, stock overview checks (MMBE), GR/IR reconciliation, improving stock accuracy and support production planning

Skills

FUNCTIONAL: o9 Platform Configuration | Demand Planning | Assortment Planning | Merchandise Financial Planning | S&OP | Business Process Mapping | Master Data Management | Current-State Assessment | Stakeholder Collaboration | Data Analytics & Visualization

Technical: SQL | Python | Power BI | o9 IBPL | SAP MM | Agile Methodology | UAT / SIT

Certification

- Overview of o9 Implementation Methodology, o9 Solutions, 2024
- Profiling & Fine Tuning in IBPL & LS, o9 Solutions, 2024
- o9 Knowledge Masters in Demand Planning & Forecasting, o9 Solution, 2023
- Supply Chain Professional (SCMPro), Confederation of Indian Industry (CII), 2022

Project

AI Chatbot & Evaluation Platform | GitHub — *End-to-End LLM System Design, Testing & Deployment*

- Hands-on developed a multi-agent chatbot integrating Groq, OpenAI as a personal learning initiative— covering **intent routing, prompt engineering, guardrails, and entity extraction** — to gain deep working knowledge of how production AI systems are designed, tested, and debugged.
- Created an "**LLM-as-a-Judge**" **evaluation pipeline** that scores chatbot responses on Relevance, Fluency, Safety, and Bias — enabling data-driven decisions on prompt tuning, model selection, and identifying failure modes in generative AI outputs.
- Shipped the full application to Streamlit Cloud with **token-protected access** and an **interactive analytics dashboard**, validating the complete lifecycle from local development to production deployment, including dependency management, CI/CD via GitHub, and real-time monitoring.

Tech Stack: Python | Streamlit | Groq/Llama-3 | OpenAI | SQLite | GitHub CI/CD
